Summary

- Junior Frontend Developer and 3rd-year Computer Science student with strong foundational knowledge in **HTML5** and **CSS3**, alongside intermediate proficiency in **JavaScript** and **React.js**. Experienced in developing dynamic web applications, including complex e-commerce components and data-driven dashboards. Adept at transforming technical logic into scalable, user-friendly interfaces, and eager to bring hands-on development skills to a professional engineering team.

Education

Bachelor of Computer Science at BSU

2023-2027

Student Scientific and Technical Creative Center (under BSU)

Participant in AI Training Program

Nov 2025 – Apr 2026

- Developed structured data processing scripts implementing **Pandas DataFrame** and **Series** architectures for efficient data transformation and manipulation.

Skills

- **Languages** : HTML5, CSS3, JavaScript
- **Frameworks/Libraries**: React.js, React Router DOM, TanStack Query (React Query), Vite
- **State Management & Tools**: Axios, JS-Cookie
- **Version Control** : GitHub
- **Programming Languages** : Python, C++
- **Productivity Tools** : Microsoft Office (Word, Power Point)
- **Data Analysis & Libraries**: NumPy, Pandas (DataFrame & Series manipulation, GroupBy operations, Data Filtering and Sorting)

Experience

Frontend Developer Intern DevLab LLC (intern.devlab.lli)

Apr-2026

Software Engineering Volunteer IT and Data Management Center under the Ministry of Economy of the Republic of Azerbaijan

Sep 2025 – Jan 2026
